**SUPER SHOPS**

## Super Shops: Then & Now

A look back at the '80s performance juggernaut, and its newest incarnation.

## Diesel Builder's Guide

CarTech Auto Books & Manuals, North Branch, Minn., presents the *High-Performance Diesel Builder's Guide*, designed to be an authoritative guide to modern diesel performance. The publication covers all aspects of the modern turbo-charged diesel engine including turbochargers, intake systems, camshafts, cylinder

heads, fuel systems, combustion chambers, transmissions, and gearing. The book includes detailed guidance and commentary on tuning diesel engines from author Joe Pettitt, Gale Banks, and other industry experts.

## Duramax Intercooler Tube Upgrade

advanced FLOW engineering (aFe), Corona, Calif., offers its new intercooler tube upgrade for 2007.5-'09 6.6-liter-V-8 GM Duramax diesel engines. Constructed of mandrel-bent 3-inch 409 stainless steel and powder-coated for maximum cooling efficiency, the tubes feature two heavy-duty, five-ply reinforced couplings to easily withstand high boost pressures and maintain reliability. All hardware including constant-tension T-bolt clamps is supplied for an easy installation. Tests show it out-flows the factory intercooler tube by 67 percent.

## Bigger Stainless Exhausts

MBRP Inc., Huntsville, Ont., introduces its 5-inch stainless performance exhaust systems for Chevy/GMC, Ford and Dodge diesel pickups. Crafted from 16-gauge T-409 stainless steel, the monster-sized pipes deliver a deep and distinctive exhaust note and reduced EGTs. Part of MBRP's XP Series, the rugged and durable stainless systems are available in turbo-back, cat-back and filter-back configurations.

## Diesel Power Adjuster

Banks Power, Azusa, Calif., presents the Banks iQ™ Dashboard PC diesel monitoring system. Featuring a 5-inch color touch screen, the unit allows users to adjust power levels, control downhill cruising speed, adjust braking intensity, custom-tune numerous performance parameters, measure vehicle performance and more, all on the fly. Fully expandable and upgradeable, it also features on-screen alerts that can be set to notify the driver when engine conditions reach preset limits. Exhaust gas, coolant and transmission temperatures are continuously monitored.
