Failed Latin in school? Join the club. It means Faster, Higher, Stronger—and it's also the motto of the Olympics. We use it to describe what the products on these pages do to our Toyotas. When you call these companies, let them know you saw it in 4WD Toyota Owner magazine! Companies: send your hot products to [info@4wdtoyotaowner.com](mailto:info@4wdtoyotaowner.com) with text and high-resolution photos to get some free press.

## SACKWEAR T-SHIRTS

From the sultans of Sackwear come these three uber-cool Land Cruiser T-shirts. FJ40, FJ55 and FJ45LV's are all represented; each from their own country, too. Need a Swahili translation of 'Bomba Mbaya?' It means, "It's cool!" and that's what we think of these tees. They have a "weathered" look (like our trucks, no?) and are made of a very soft, comfortable cotton. \$15 each. There are two more designs (FJ40 and FJ45), which you can get for a package deal of \$69 for all five. Check them out at [www.sackwear.com](http://www.sackwear.com).

## ADVANCED FLOW ENGINEERING 4.7L V8 THROTTLE SPACER

advanced FLOW engineering (aFe), announces the release of their new Silver Bullet Throttle Spacers for the 2005-08 Toyota Tundra and 2003-08 Toyota 4Runner with 4.7L V8. aFe says the Silver Bullet Throttle Spacers are designed using a serrated/helix design that thoroughly mixes the air/fuel charge for a complete burn increasing horsepower, torque and improved throttle response. The serrated entry design eliminates the annoying whistle at idle and cruising speeds that is common among standard helix designed spacers. The additional space increases the volume between throttle and cylinder improving volumetric efficiency. It is constructed of machined T-6061 billet aluminum for increased strength, durability and an aggressive look to your intake tract. aFe says the throttle spacer produces an additional 10hp and 12 ft/lbs of torque. Part # 46-38004 has an MSRP of \$116. Call aFe at (951) 493-7100.
